

# All-Trace Trace Element Boluses For Dry Cows (For export only)

## Bolus Technology

Resin skin controls release rate ensuring consistent daily supply of nutrients

Trace element matrix erodes and nutrients are released into the reticulum

Dissolvable end-weight ensures bolus remains in reticulum. No residues left after active life

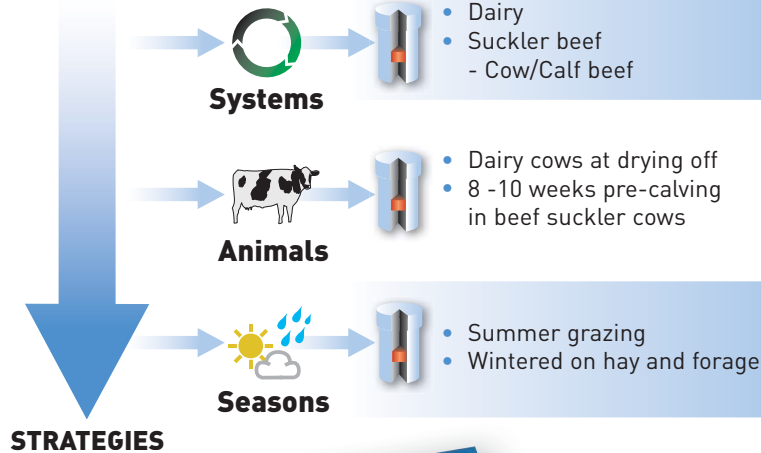

### Active Component

### Daily supply over 120 days from 2 boluses

<b>Copper</b>	98.3 mg
<b>Cobalt</b>	4.0 mg
<b>Selenium</b>	2.4 mg
<b>Manganese</b>	152.3 mg
<b>Zinc</b>	254.7 mg
<b>Iodine</b>	16.7 mg
<b>Vitamin A</b>	9,395.0 i.u.
<b>Vitamin D<sub>3</sub></b>	1,879.0 i.u.
<b>Vitamin E</b>	28.0 i.u.

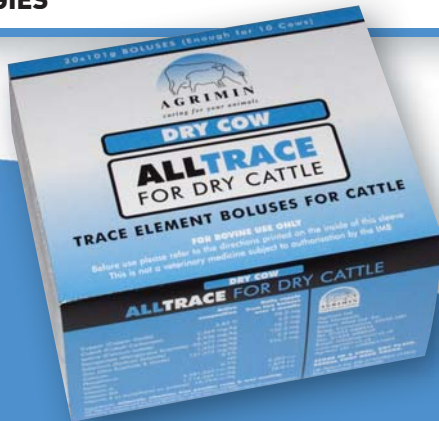

## When to use All-Trace for Dry Cows

### ALL-TRACE

## Benefits

- Easier, cleaner calvings
- Strong, healthy calves
- Reduced calving spread
- Optimise conception rates
- Optimise general condition
- Twin bolus gun means simple application
- Cows can be given boluses at the same time as drying off routines such as hoof trimming and intramammary tubing
- Active life 120 days**
- Administer 2 boluses per animal (over 150 kg)**
- Pack size - 20 boluses**
